COVID-19 Response Plan

For Students

Last updated 22/10/2020

Summary

SITUATION
Has symptoms
Advised to take a test because of symptoms
Confirmed positive
Identified as a close contact and advised to take a test
Advised to restrict movement and not to take a test
COVID-19 not detected test result

STUDENTS
Self-isolate Seek medical advice
Self-isolate
Self-isolate
Restrict movement
Restrict movement
Restrict movement as advised, then return to campus

CLOSE CONTACT
The people you live with should restrict movements for 14 days. Remind others to take precautions
The people you live with should restrict movements for 14 days. Remind others to take precautions
Restrict movement and follow advice from contact tracing
Continue with standard COVID-19 precautions
Continue with standard COVID-19 precautions
Continue with standard COVID-19 precautions

1. What to do if you have COVID-19 symptoms on campus

Event	Immediate Student Action	Student Follow on Action
1.1 Student develops COVID-19 symptoms on campus and feels well enough to travel home by private transport	Contact Student Health Centre or return home and contact GP	Follow advice from Student Health Centre or GP.
1.2 Student develops COVID-19 symptoms on campus but does not feel well enough to travel home immediately.	Contact Student Health Centre. You will be directed to the isolation area and will remain there until transport has been arranged to go home.	Follow advice from Student Health Centre.
1.3 Student tests positive OR	Follow the instructions of the HSE Public Health Team. Provide details of close contacts to HSE.	Follow HSE advice and self-isolate until you have had no fever for 5 days and it is at least 10 days since the first symptoms developed. Inform the Student Health Centre and your Course Coordinator.
1.4 Student tests ' not detected '.	Inform Student Health Centre of 'not detected'. Return to normal activities after 48 hours without symptoms	Continue to maintain key control measure to reduce the spread of COVID-19.

2. What to do if you have symptoms of COVID-19 off campus?

Event	Immediate Student Action	Student Follow on Action
2.1	Student develops COVID-19 symptoms off campus.	Stay away from campus. Contact your GP (<i>or Student Health Centre</i>). Self-isolate.
2.2	Student takes COVID-19 test.	Ensure contact log is up to date in case needed.
2.3 OR	Student tests positive .	Self-isolate until advised otherwise by GP (<i>or Student Health Centre</i>) and HSE.
2.4	Student tests ' not detected '.	Follow GP (<i>or Student Health Centre</i>) and HSE advice and self-isolate until you have had no fever for 5 days and until at least 10 days since the first symptoms developed.
	Inform GP or Student Health Centre of 'not detected'. Return to normal activities after 48 hours without symptoms.	Continue to maintain key control measures to reduce the spread of COVID-19.

3. COVID-19 Close Contact of Confirmed Case

Event	Immediate Student Action	Student Follow on Action
3.1	Student contacted by HSE or confirmed case as close contact.	If advised, restrict movements for 14 days. Inform GP or Student Health Centre.
3.2	Student takes COVID-19 test and result is positive .	Follow HSE advice on restricting movements and testing.
3.3	Student takes COVID-19 test and result is ' not detected '	Continue to restrict your movements for 14 days and do not return to normal activity until GP or Student Health Centre advises to do so.
	Inform GP or Student Health Centre. If advised, get a second COVID-19 test. Inform GP or Student Health Centre of test result.	Stay away from campus if test is positive. If 'not detected', return to campus after restricted movement period ends and in line with GP or Student Health Centre/HSE advice.

4. Living with COVID-19 Symptomatic Person

	Event	Immediate Student Action	Student Follow on Action
4.1	Student lives with someone who has developed symptoms of COVID-19.	Stay away from campus, restrict your movements while person is awaiting a test/test results.	Inform GP (or Student Health Centre.)
4.2	The resolution of this scenarios will depend on the details. If you are caring from someone who is self isolating please see point 6. If the memebr of the household tests positive, you will become a close contact If the member of the household's test is not detected, the restriced movement will be lifed and the person can return to campus in line with government guidelines		

5: Living with a COVID-19 Close Contact Person

	Event	Immediate Student Action	Student Follow on Action
5.1	Student is living with close contact who has no symptoms of COVID-19.	Attend campus and continue to maintain key control measures to reduce the spread of COVID-19.	No action needed.
5.2	Student is living with close contact who develops symptoms of COVID-19	Stay away from campus, until close contact has received test results.	Inform GP or Student Health Centre.
	The resolution of this scenario will depend on the details. For example, if the close contact's test is positive, the household member will have to restrict their movements for 14 days and will be tested. If the close contact's test is negative, the restricted movement will be lifted and the person can return to campus immediately.		

6: Caring for someone with a COVID-19 who cannot self isolate

	Event	Immediate Student Action	Student Follow on Action
6.1	Student is main carer for someone who develops symptoms but cannot self-isolate – eg, a child, older person or someone with a disability.	Restrict your movements for 17days from when they first developed symptoms	Inform GP or Student Health Centre
6.2	Information on how to care for someone who cannot self isolate can be found here
