The AI Assessment Scale in Practice

May 29th

10:00 AM

This session will focus on practical, discipline-specific, and contextually relevant applications of the AI Assessment Scale in authentic assessment scenarios.

Emphasis will be placed on applied assessment design rather than theoretical debate.

Participants will examine concrete examples of assessment practices that align effectively with the Scale, alongside illustrative cases where misalignment has resulted in ambiguity, academic integrity challenges, or unintended pedagogical outcomes.

Cognitive Offloading, GenAI, and the Future of Learning

June 10th

10:00 AM

Drawing on recent research into cognitive offloading and its implications for education, this webinar explores the growing tension between performance and learning in an AI-enabled world.

While AI can enhance efficiency and output, it can also bypass the very cognitive processes that are the foundation of deep and meaningful learning.

All Welcome
