#### 1.0 POLICY

The School of Engineering provides and maintains laboratories for the purpose of supporting courses run by the School. In order to ensure a safe, learning environment, and to maintain the high standard and quality of laboratory and classroom resources, all users of School laboratories are required, at all times, to comply with the School of Engineering policy outlined below.

#### 2.0 PURPOSE

The purpose of this procedure is to outline to the Institutes staff the proper code of conduct to be observed by all users of the School of Engineering Laboratories.

#### 3.0 ORGANISATIONAL UNITS AFFECTED

All units

#### 4.0 DEFINITIONS

None

#### **5.0 RESPONSIBILITY**

It is the responsibility of the Head of School and Heads of Department (Electronic and Mechanical) to ensure compliance with this procedure.

#### 6.0 DESCRIPTION OF PROCEDURE

- 6.1 Eating and/or drinking in laboratories is not permitted at any time.
- 6.2 School resources should not be used to download, distribute and/or play games, music or videos.
- 6.3 School resources must not be used to download, distribute and/or view material, likely to cause offence to others.
- 6.4 All litter must be disposed of properly in the appropriate bins provided.
- 6.5 Modification and/or repairs to laboratory equipment or computers must only be performed by ITTD technical support staff or external authorised contractors.
- 6.6 All persons using the laboratory and its resources must do so with due regard for other users and must behave in a manner that will not cause offence or disruption.
- 6.7 Laboratory resources must be used for legitimate coursework purposes and authorised activities only.

- 6.8 It is a condition of use of the laboratory, that users maintain a safe and tidy workspace. On completion of work, users must leave their workspace tidy (all equipment and accessories must be switched off and returned into storage, where applicable, and any waste material must be disposed of in the correct manner). Computer users should logout. Return chairs and any laboratory furniture to their correct positions.
- 6.9 Laboratory equipment, tools and materials must be used in a proper and responsible manner at all times. If in doubt, consult the supervising lecturer or laboratory technician.
- 6.10 Where required, users must comply with the wearing of personal protective clothing and accessories, such as safety goggles.
- 6.11 Laboratory users are obliged to immediately report to the supervising lecturer or laboratory technician, all accidents or equipment faults or damage.
- 6.14 It is a condition of use of a laboratory that all users must comply with any instructions issued by authorised ITTD staff to ensure best and safe practice within the laboratory environment.
- 6.15 It is a condition of use of the <u>EV Lab</u> that all users must comply with the standard operating procedures specified below which govern the safe use of particular laboratory resources/processes deemed to carry a risk associated with their use. These procedures are available from the technical officer responsible for the laboratory.

TBA

These procedures are available from the technical officer responsible for the laboratory.

#### 7.0 REVISION OF THIS PROTOCOL

- 7.1 Where an error, omission, or possible improvement to this protocol is identified by any member of staff, that information should be brought to the attention of the HOD / HOS as soon as possible in order that this protocol may be revised immediately.
- 7.2 This protocol will be subject to review at the end of each academic year to reflect any change in Institute, School, or Department policy or any identified error, omission, or improvement.
- 7.3 All changes will be carried out in accordance with the policy for the 'Generation of new SOPs and update and revision of existing SOPs DR001'.

## Appendix A: Nines Laboratory Risk Assessments and Safety Information

#### Note:

This laboratory has been temporarily designated for use by Nines Photovoltaics. The attached risk assessment was conducted and supplied by Nines Photovoltaics and is presented below **Risk Assessment for Nines Photovoltaics – Lab 017A)** 

**Risk Assessment/Control Data – Lab17A(Nines Photovoltaics)** 

Hazard/Consequence	Control	<b>Risk Evaluation</b>	Date Identified	Action Person	Date Rectified
Chemical Hazard ADE Reactor unintentional opening Pneumatic circuit could lose energy.	Mechanical The reactor is enclosed in a locked and ventilated enclosures that will detect and contain any chemical hazardous release but as an added measure ADE reactor should also be mechanically fixed in the closed position. #### Materials Safety Sheets – Lab17A (Nines Photovoltaics)

## **FLUORINE/NITROGEN (20/80)**

SECTION 1. IDENTIFICATION OF T	HE SUBSTANCE/MIXTURE AND OF THE
COMPANY/UNDERTAKING	
1.1. Product identifier	
- Product name	: FLUORINE/NITROGEN (20/80)
- Molecular formula	: F2/N2
- Type of product	: Mixture
1.2. Relevant identified uses of t	he substance or mixture and uses advised against
- Identified uses	<ul> <li>Automotive industry</li> <li>Plastic industry</li> <li>Chemical industry</li> <li>Electronic industry</li> </ul>
1.3. Details of the supplier of the	e safety data sheet
- Company	: SOLVAY CHEMICALS INTERNATIONAL SA
- Address	: RUE DE RANSBEEK, 310 B- 1120 BRUXELLES
- Telephone	: +3222642111
- Fax	:
- E-mail address	: <u>manager.sds@solvay.com</u>
1.4. Emergency telephone numb	er
- Emergency telephone number	+44(0)1235 239 670 [CareChem 24] (Europe)

#### **SECTION 2. HAZARDS IDENTIFICATION**

#### 2.1. Classification of the substance or mixture

2.1.1. European regulation (EC) 1272/2008, as amended

Classified as hazardous according to the European regulation (EC) 1272/2008, as amended

Hazard class	Hazard category	Route of exposure	H Phrases
Oxidising gases	Category 1		H270
Gases under pressure	Compressed gas		H280
Acute toxicity	Category 2	Inhalation	H330
Skin corrosion	Category 1A		H314

2.1.2. European Directive 67/548/EEC or 1999/45/EC, as amended

Classified as hazardous according to European Directive 67/548/EEC or 1999/45/EC, as amended

Hazard class / Hazard category	R-phrase(s)
0	R 7
T+	R26
С	R35

#### 2.2. Label elements

- 2.2.1. Name(s) on label
  - Hazardous components
- 2.2.2. Signal word
  - Danger
- 2.2.3. Hazard pictograms

#### 2.2.4. Hazard statements

- H270 H280 H314
- H314 H330
- May cause or intensify fire; oxidiser.
   Contains day under pressure: may elements

: Fluorine (20 %)

- Contains gas under pressure; may explode if heated.
  Causes severe skin burns and eye damage.
- Causes severe skin burns and eye damage
   Fatal if inhaled.
- 2.2.5. Precautionary statements

Prevention	P220	-	Keep/Store away from clothing/ flammable /combustible materials.
	P260	-	Do not breathe dust/ fume/ gas/ mist/ vapours/ spray.
	P280	-	Wear protective gloves/ protective clothing/ eye protection/ face protection.
Response	P303 + P361 + P353	-	IF ON SKIN (or hair): Remove/ Take off immediately all contaminated clothing. Rinse skin with water/ shower.
	P305 + P351 + P338	-	
	P310	-	Immediately call a POISON CENTER or doctor/physician.

#### 2.3. Other hazards

- Chronic exposure to the product can cause bone calcification disorders.

#### SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

#### 3.2 Mixtures

#### 3.2.1.Concentration

Substance name:	Concentration
Fluorine	ca. 20 %
CAS-No.: 7782-41-4 / EC-No.: 231-954-8 / Index-No.: 009-001-00-0	
Nitrogen	ca. 80 %
1	

#### 3.2.2. Hazardous components - According to Regulation (EC) 1272/2008, asamended

Substance name	Hazard class	Hazard category	Route of exposure	H Phrases
Fluorine	Gases under pressure	Compressed gas		H280
	Oxidising gases	Category 1		H270
	Acute toxicity	Category 2	Inhalation	H330
	Skin corrosion	Category 1A		H314

#### 3.2.3. Hazardous components - European Directive 67/548/EEC or 1999/45/EC, asamended

Substance name	Classification	Hazard category	R-phrase(s)
Fluorine	0	Oxidising	R 7
	T+	Very toxic	R26
	С	Corrosive	R35

#### **SECTION 4. FIRST AID MEASURES**

#### 4.1. Description of first aid measures

#### 4.1.1. If inhaled

- In case of accident by inhalation: remove casualty to fresh air and keep atrest.
- Oxygen or artificial respiration if needed.
- Victim to lie down in the recovery position, cover and keep him warm.
- Call a physician immediately.
- Take victim immediately to hospital.

#### 4.1.2. In case of eye contact

- Immediate medical attention is required.
- Take victim immediately to hospital.
- Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes.
- In the case of difficulty of opening the lids, administer an analgesic eye wash (oxybuprocaine).

#### 4.1.3. In case of skin contact

- Call a physician immediately.
- Take victim immediately to hospital.
- Take off contaminated clothing and shoesimmediately.
- Wash off with plenty of water.
- First treatment with calcium gluconate paste.

#### 4.1.4. If swallowed

not applicable

#### 4.2. Most important symptoms and effects, both acute and delayed

#### 4.2.1. Inhalation

- Inhalation of vapours is irritating to the respiratory system, may cause throat pain and cough.
- Aspiration may cause pulmonary oedema and pneumonitis.
- risk of hypocalcemia with nervous problems (tetany) and cardiacarrhythmia
- Symptoms: Breathing difficulties, sore throat, Nosebleeding
- Repeated exposure: chronic bronchitis

#### 4.2.2. Skin contact

- Causes severe burns.
- Intoxication hazards by simultaneous inhalation of the product.
- Risk of shock.
- Risk of hypocalcemia following the extent of thelesions.
- Symptoms: Irritation, Redness, Swelling of tissue, Burn

#### 4.2.3. Eye contact

- May cause permanent eye injury.
- May cause blindness.
- Intoxication hazards by simultaneous inhalation of the product.
- Symptoms: Lachrymation, Redness, Swelling of tissue, Burn
- 4.2.4. Ingestion
  - gas
  - not applicable

#### 4.3. Indication of any immediate medical attention and special treatment needed

- HF-Antidote Gel from IPS Healthcare is recommended as treatment for injuries from hydrofluoric acid.
- If skin irritation occurs:
  - Immediately apply calcium gluconate gel 2.5% and massage into the affected area using rubber gloves; continue to massage while repeatedly applying gel until 15 minutes after pain is relieved.

#### **SECTION 5. FIREFIGHTING MEASURES**

#### 5.1. Extinguishing media

#### 5.1.1. Suitable extinguishing media

- powder
  - Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

#### 5.1.2. Unsuitable extinguishing media

- Never use water.

#### 5.2. Special hazards arising from the substance or mixture

- Oxidizer
- Contact with flammables may cause fire or explosions.
- Pay attention to the spreading of gases especially at ground level (heavier than air) and to the direction of the wind.
- Contact with water liberates hazardous gas.
- Contact with water may produce heat release and presents risks of splashing.
- Hazardous decomposition products formed under fire conditions.

#### 5.3. Advice for firefighters

- Evacuate personnel to safe areas.
- Wear self-contained breathing apparatus and protective suit.
- Wear chemical resistant oversuit
- Protect intervention team with a water spray as they approach thefire.
- Clean contaminated surface thoroughly.
- Keep product and empty container away from heat and sources ofignition.
- Cool containers / tanks with water spray.
- Keep from any possible contact with water.
- Approach from upwind.
- Never spray water onto a spillage of liquid gas.
- Never try to extinguish a burning gas leak which cannot be stopped or controlled.
- Prevent fire extinguishing water from contaminating surface water or the ground water system.

#### SECTION 6. ACCIDENTAL RELEASE MEASURES

#### 6.1. Personal precautions, protective equipment and emergency procedures

- 6.1.1. Advice for non-emergency personnel
  - Keep people away from and upwind of spill/leak.
  - Advice people to take refuge in upper floors and in closed rooms and to wait for instructions.

#### 6.1.2. Advice for emergency responders

- Wear self-contained breathing apparatus and protective suit.
- Keep away from open flames, hot surfaces and sources of ignition.
- Approach from upwind.
- Suppress (knock down) gases/vapours/mists with a water sprayjet.
- Avoid spraying the leak source.
- Try to re-position leaking containers, to have the leak in the gaseous phase.
- Ventilate the area.
- Prevent further leakage or spillage if safe to do so.
- Keep away from Incompatible products.

#### 6.2. Environmental precautions

- Discharge into the environment must be avoided.
- If the product contaminates rivers and lakes or drains inform respective authorities.
- Prevent product from entering drains.

#### 6.3. Methods and materials for containment and cleaning up

- Prevent product from entering drains.
- If possible, dam up the resulting liquid phase with sand orearth.
- Treat recovered material as described in the section "Disposal considerations".

#### 6.4. Reference to other sections

- Refer to protective measures listed in sections 7 and 8.

#### **SECTION 7. HANDLING AND STORAGE**

#### 7.1. Precautions for safe handling

- Carry out all operations in closed piping circuits and equipment.
- Use only in well-ventilated areas.
- Before all operations, passivate the piping circuits and vessels according to the procedure recommended by the producer.
- Clean and dry piping circuits and equipment before any operations.
- Purge piping circuits and equipment with nitrogen.
- Purge open drums with nitrogen before resealing.
- Use only equipment and materials which are compatible with the product.
- Keep away from heat and sources of ignition.
- Containers and equipment used to handle the product should be used exclusively for that product.
- Keep away from water.
- Provide piping circuits assembled by welding, or equipped with flanges using metallic gaskets compatible with the product.
- Provide shields between piping circuits or equipment and the operators; provide preferably remote operated valves.
- Provide pressure reducers at the outlet of gas cylinders.
- Do not attempt to regulate flow rate or pressure from the cylinder valve, use a suitable regulating device.
- Do not subject piping circuits or equipment to abnormal mechanical stress.
- For further information, please contact: Supplier
- Avoid inhalation, ingestion and contact with skin and eyes.
- Keep away from Organic materials.

#### 7.2. Conditions for storage, including incompatibilities

#### 7.2.1. Storage

- Keep tightly closed in a dry, cool and well-ventilated place.
- Keep away from combustible material.
- Keep away from direct sunlight.
- Keep away from heat and sources of ignition.
- Do not store in confined space.
- Keep the cylinder cap hermetically closed and open it cautiously.

Provide tight electrical equipment well protected against corrosion.

#### 7.2.2. Packaging material

#### 7.2.2.1. Suitable material

- Stainless steel cleaned and passived
- 7.2.2.2. Unsuitable material
  - Aluminium
    - in cardboard box
    - glass bottles
    - Paper bags
    - Plastic material, including expanded plastics material
    - Woven plastic material.

#### 7.3. Specific end use(s)

For further information, please contact: Supplier

#### SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

#### 8.1. Control parameters

8.1.1. Exposure Limit Values

#### Fluorine

- Ireland. Occupational Exposure Limits 2011 time weighted average = 1 ppm time weighted average = 1,58 mg/m3 Remarks: Indicative OELV
- Ireland. Occupational Exposure Limits 2011 Short term exposure limit = 2 ppm Short term exposure limit = 3,16 mg/m3 Remarks: Indicative OELV
- <u>US. ACGIH Threshold Limit Values 03 2013</u> time weighted average = 1 ppm
- <u>US. ACGIH Threshold Limit Values 03 2013</u> Short term exposure limit = 2 ppm
- <u>EU. Indicative Exposure Limit Values in Directives 91/322/EEC, 2000/39/EC, 2006/15/EC, 2009/161/EU 12 2009</u> time weighted average = 1 ppm time weighted average = 1,58 mg/m3 Remarks: Indicative
- <u>EU. Indicative Exposure Limit Values in Directives 91/322/EEC, 2000/39/EC, 2006/15/EC, 2009/161/EU 12 2009</u> Short term exposure limit = 2 ppm Short term exposure limit = 3,16 mg/m3 Remarks: Indicative

#### Nitrogen

- Ireland. Occupational Exposure Limits 2011
- Remarks: Included in the regulation but with no data values. See regulation for further details. US. ACGIH Threshold Limit Values 03 2013
- Remarks: Included in the regulation but with no data values. See regulation for further details.

#### 8.2. Exposure controls

#### 8.2.1. Appropriate engineering controls

- Use only with adequate ventilation and in closed systems.
- Apply technical measures to comply with the occupational exposure limits.
- Detection of small leaks using ammonia or preferably KI (potassiumiodide) papers or qualified leak detectors

#### 8.2.2. Individual protection measures

#### 8.2.2.1. Respiratory protection

- Self-contained breathing apparatus in confined spaces/insufficient oxygen/in case of large uncontrolled emissions/in all circumstances when the mask and cartridge do not give adequate protection.
- Use only respiratory protection that conforms to international/ national standards.
- Respirator with a full face mask
- Recommended Filter type: B
- 8.2.2.2. Hand protection

\_

- Wear suitable gloves.
  - Suitable material: Copolymer VF2-HFP (fluoroelastomer)
- 8.2.2.3. Eye protection
  - Chemical resistant goggles must be worn.
- 8.2.2.4. Skin and body protection
  - Complete suit protecting against chemicals
  - impervious clothing
- 8.2.2.5. Hygiene measures
  - Eye wash bottles or eye wash stations in compliance with applicablestandards.
  - Handle in accordance with good industrial hygiene and safety practice.
  - Consult the industrial hygienist or the safety manager for the selection of personal protective equipment suitable for the working conditions.
- 8.2.3. Environmental exposure controls
  - Dispose of rinse water in accordance with local and national regulations.

#### **SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES**

#### 9.1. Information on basic physical and chemical properties

9.1.1. General Information

	Odour	Compressed gas colourless pungent
9.1.2. <u>I</u>	mportant health safety and environment	al information
	рН	not applicable
	рКа	not applicable
	Melting point/freezing point	-220 °C (Fluorine)
	Boiling point/boiling range	-188 °C (Fluorine)
	Flash point	not applicable
	Evaporation rate	No data
	Flammability (solid, gas)	The product is not flammable.
	Flammability	not applicable
	Explosive properties	See section 10.
	Vapour pressure	1.013 mbar, at -188 °C
	Vapour density	1,3 (Fluorine)
	Density	No data
	Relative density	1,51, at -188 °C (Fluorine)
	Bulk density	not applicable

		Solubility(ies)	not applicable
		Solubility/qualitative Partition coefficient: n-	Decomposes in contact with water.
	۳	octanol/water	not applicable
		Auto-ignition temperature	No data
		Decomposition temperature	No data
		Viscosity	1.013 mPa.s, at 25 °C (Fluorine)
		Oxidizing properties	Oxidizing properties
9.2.	Oth	er information	
		Critical temperature	-129,2 °C (Fluorine)
		Critical pressure	55,72 hPa (Fluorine)

#### SECTION 10. STABILITY AND REACTIVITY

#### 10.1. Reactivity

- Risk of ignition.
- Risk of explosion.
- Reacts violently with water.

#### 10.2. Chemical stability

- Chemically very reactive
  - Stable under recommended storage conditions.

#### 10.3. Possibility of hazardous reactions

- Decomposes in contact with water.
- Fire or intense heat may cause violent rupture of packages.
- Heating can release hazardous gases.
- Gives off hydrogen by reaction with metals.

#### 10.4. Conditions to avoid

- Heat.
- Exposure to moisture.

#### 10.5. Incompatible materials

- Organic materials, Flammable materials, Combustible material, Hydrogen

#### 10.6. Hazardous decomposition products

- Hydrogen fluoride

#### SECTION 11. TOXICOLOGICAL INFORMATION

#### 11.1. Acute toxicity

- 11.1.1. Acute inhalation toxicity
  - LC50, 1 h, rat , 925 ppm, calculated value

#### 11.1.2. Irritation (other route)

- Inhalation, rat, Corrosive (Fluorine)

#### 11.2. Skin corrosion/irritation

- Corrosive (Fluorine)

#### 11.3. Serious eye damage/eye irritation

- Corrosive (Fluorine)

#### 11.4. Sensitisation

- no data available

#### 11.5. Mutagenicity

- no data available

#### 11.6. Carcinogenicity

- The carcinogenic effect found in animals is not demonstrated in human (Fluorine)

#### 11.7. Toxicity for reproduction

- Risk of toxic effect on reproduction (Fluorine)

#### 11.8. Repeated dose toxicity

- Inhalation, Prolonged exposure, rat, Target Organs: Respiratory system, Central nervous system, Cardio- vascular system, testes, Kidney, Liver, observed effect (Hydrogenfluoride)

#### 11.9. Other information

no data available

#### SECTION 12. ECOLOGICAL INFORMATION

#### 12.1. Toxicity

- Fishes, Salmo gairdneri, LC50, 96 h, 51 mg/l (Fluorides)
- Crustaceans, Daphnia magna, EC50, 48 h, 97 mg/l, fresh water (Fluorides)
- Crustaceans, Mysidopsis bahia, EC50, 96 h, 10,5 mg/l, salt water (Fluorides)
- Fishes, Salmo gairdneri, LC50, 21 Days, from 2,7 4,7 mg/l (Fluorides)
- Crustaceans, Daphnia magna, NOEC, 21 Days, 3,7 mg/l(Fluorides)
- Algae, Scenedesmus sp., EC50, 96 h, 43 mg/l (Fluorides)

#### 12.2. Persistence and degradability

#### 12.2.1. Abiotic degradation

- Water, Soil
  - Result: complexation/precipitation of inorganic materials (Fluorides)
  - Water, Soil Result:

hydrolyses Degradation products: hydrofluoric acid / fluoride (Fluorine)

#### 12.2.2. Biodegradation

- The methods for determining biodegradability are not applicable to inorganic substances. (Fluorine)

12.3. Bioaccumulative potential

Result: The methods for determining the biological degradability are not applicable to inorganic substances.
 (Fluorine)

12.4. Mobility in soil

Reacts violently with water. (Fluorine)

- no data available
- no data available

12.6. Other adverse effects

12.5. Results of PBT and vPvB assessment

#### **SECTION 13. DISPOSAL CONSIDERATIONS**

#### 13.1. Waste treatment methods

- Refer to manufacturer/supplier for information onrecovery/recycling.
- or
- Absorb the product in a KOH solution.
- Filtrate the product and send the cake to a landfill for industrial waste.
- Discharge liquid filtrate to a wastewater treatment system

#### 13.2. Contaminated packaging

- To avoid treatments, as far as possible, use dedicated containers.
- Do not rinse the dedicated containers.

#### **SECTION 14. TRANSPORT INFORMATION**

#### 15.2. Chemical Safety Assessment

- no data available

#### SECTION 16. OTHER INFORMATION

#### 16.1. Full text of H-Statements referred to under section 3

H270 H280 H314 H330	-	May cause or intensify fire; oxidiser. Contains gas under pressure; may explode if heated. Causes severe skin burns and eye damage. Fatal if inhaled.			
16.2. Full text of R-phrases referred to under sections 2 and 3					

16.2.1. Full text of R-phrases referred to under section 2 R 7

	-	May cause fire.
R26	-	Very toxic by inhalation.
R35	-	Causes severe burns.
16.2.2. Full text of R-phrases re	eferred to und	er section 3 R 7

	-	May cause f	fire

		way cause me.
R26	-	Very toxic by inhalation.
R35	-	Causes severe burns.

#### 16.3. Other information

Update

This data sheet contains changes from the previous version in section(s): 1.3,5.3,6,7,8,14,15.1.1

This SDS is only intended for the indicated country to which it is applicable. The European SDS format compliant with the applicable European legislation is not intended for use nor distribution in countries outside the European Union with the exception of Norway and Switzerland. Safety datasheets applicable in other countries/regions are available upon request.

The information given corresponds to the current state of our knowledge and experience of the product, and is not exhaustive. This applies to product which conforms to the specification, unless otherwise stated. In this case of combinations and mixtures one must make sure that no new dangers can arise. In any case, the user is not exempt from

observing all legal, administrative and regulatory procedures relating to the product, personal hygiene, and protection of human welfare and the environment.

#### 5.13.2. Commissioning Sign-Off

#### FINAL SIGN OFF

## **CLEANVENT DATA SHEET**

Fraunhoferstrasse 4 85737 lemaning Germany Phone: +49 (89) 96 24 00-0 Fax: +49 (89) 96 24 00-122 sales@csclean.com www.cscleaneystems.com

I

CLEANVENT Type / Serial No.	CV02S / CV02S15011
Filling Code	FC 9577
Filling suitable for gas species*	F2 (N <sub>2</sub> , H <sub>2</sub> )
Capacity	120 standard litres
Outlet Concentration	
Intended use	Passive dry-bed absorber for removal of hazardous vent gases
Construction material	316 / 316L stainless steel
Construction features	Overall length 400 mm, outside diameter 114 mm, 1/4" VCR compatible fittings at inlet and outlet
Environmental temperature range	5-35 °C (40-95 °F) (please contact manufacturer if different temperature range required)
installation site	indoors
Installation site Operation pressure	indoors ≤ 1 MPa (145 psi)
Operation pressure	≤ 1 MPa (145 psi)
Operation pressure Emergency relief valve	≤ 1 MPa (145 psi) fitted
Operation pressure Emergency relief valve Wallmounting included	≤ 1 MPa (145 psi) fitted yes
Operation pressure Emergency relief valve Wallmounting included Inlet flow restrictor	≤ 1 MPa (145 psi) fitted yes internal
Operation pressure Emergency relief valve Wallmounting included Inlet flow restrictor Weight Month of expiry	≤ 1 MPa (145 psi) fitted yes internal Approx. 8 kg 05/2017
Operation pressure Emergency relief valve Wallmounting included Inlet flow restrictor Weight Month of expiry	≤ 1 MPa (145 psi) fitted yes internal Approx. 8 kg

\* Gases listed in (brackets) are permitted, but not retained by the cartridge. Before installing the CLEANVENT cartridge please ensure that you have read the operating manual.
