

DEVELOPMENT:

The development is a social housing project strategically located in the heart of the vibrant town of Mullingar. The client is Westmeath County Council who will be the long-term owner of the development.

CLIENT OBJECTIVES:

The client had specific design objectives which required to be achieved as follows:

- The client wished the development to comply with NZEB STANDARDS.
- The client required LIMITED USER INTERACTION with systems as best as possible.
- The client wished to incorporate an ARRAY OF NEW TECHNOLOGIES to trial new concepts for future social housing projects.
- The client wished to use a TRADITIONAL FORM CONSTRUCTION.

NZEB TARGET:
30 kWh/m²/yr with 35 kWh/m².yr of on-site renewables

SITE LAYOUT

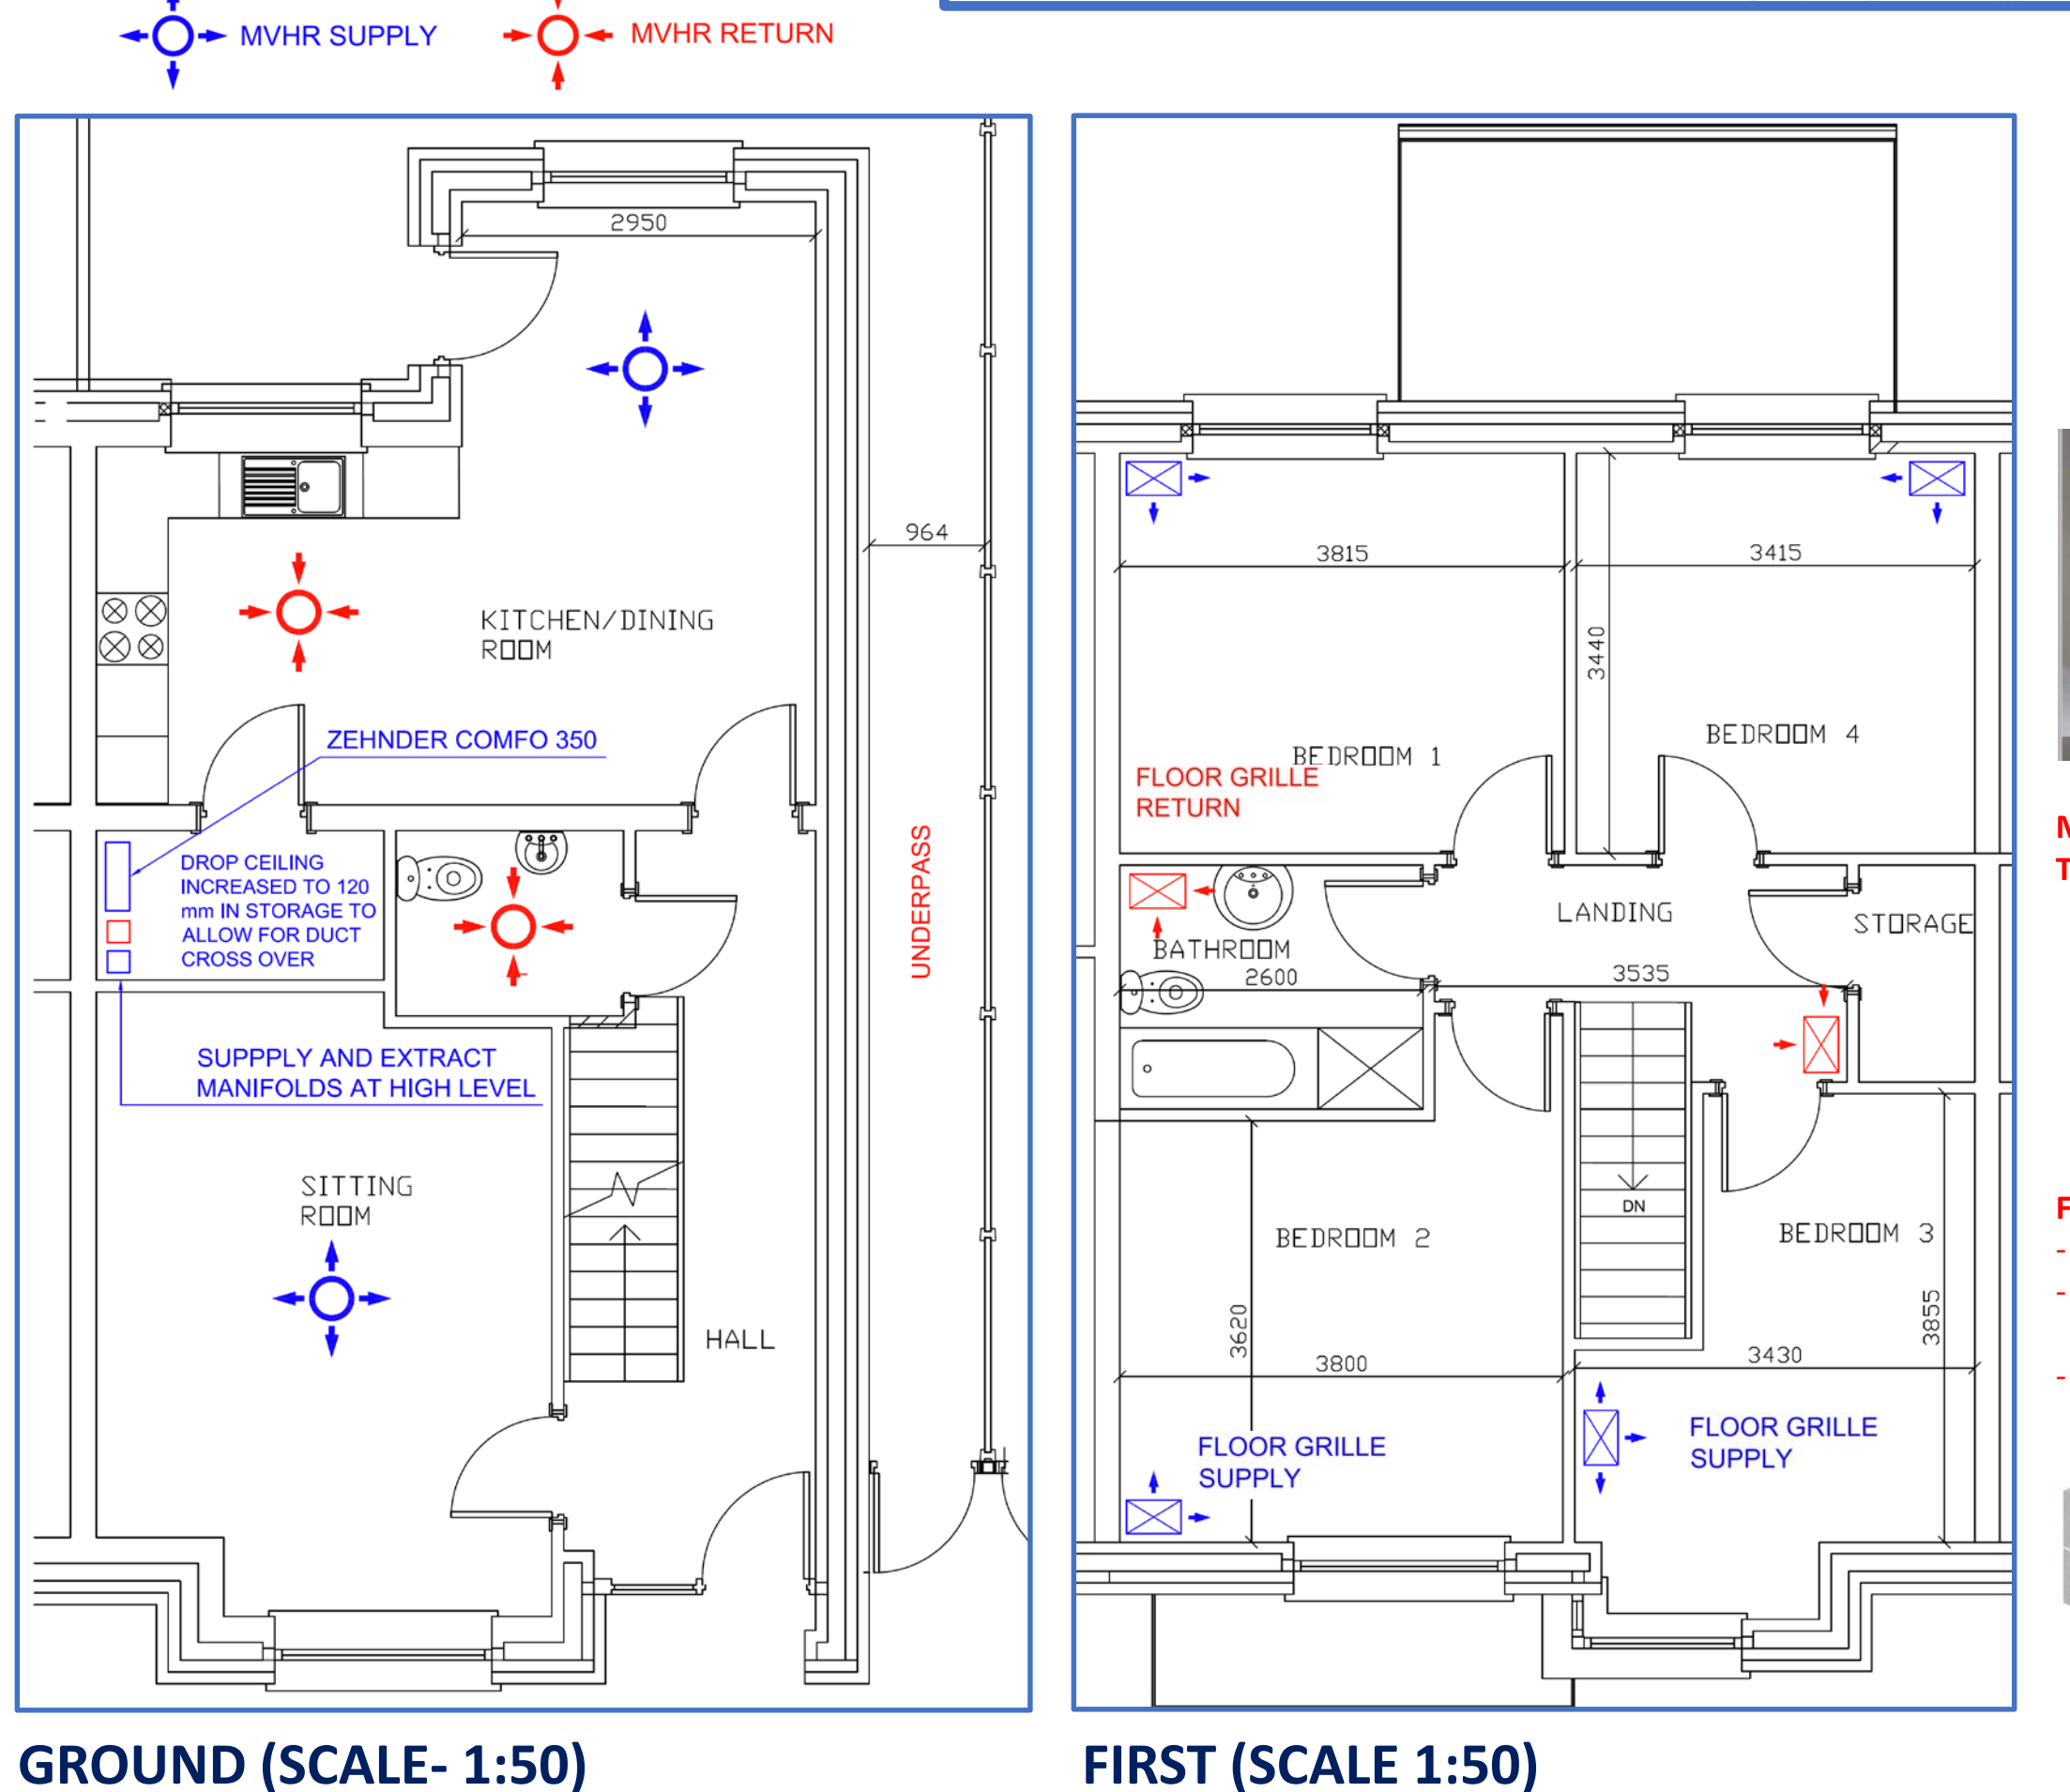

STEP 1 : PATH TO NZEB (CONCEPT DESIGNS OPTIONS)

Reference:	Part L - Option 1 (Gas Boiler)	Part L - Option 2 (Heat Pump)	Option 3 - NZEB	Option 4 - NZEB	Option 5 - NZEB	Option 6 - NZEB	Option 7 - NZEB
Summary of Proposed Provision	Gas Boiler, Natural Ventilation, Triple Glazing, Calculated Thermal Bridging, Solar Water Heating	Heat Pump, Natural Ventilation, Double Glazing, Default Thermal Bridging (0.15)	Heat Pump, Natural Ventilation, Triple Glazing, Calculated Thermal Bridging (0.08), Solar Water Heating (3.2 m ² PV (3.8 m ² panel (2 no. 50 kWp))	Electricity, Triple Glazing, Calculated Thermal Bridging, Solar Water Heating, PV, Solar Heating (MWV), Enhanced U Values, Instantaneous Waste Heat Recovery	Power Factor @ 1.8; Electricity, Triple Glazing, Calculated Thermal Bridging, Solar Water Heating, MWV, 304 x 60 rectangular duct; Enhanced U Values	Gas Boiler, Triple Glazing, Thermal Bridging Calculated; Solar Water Heating, MWV, 304 x 60 rectangular duct; Enhanced U Values	Oil Boiler, Triple Glazing, Thermal Bridging Calculated; Solar Water Heating, PV, MWV, 200 x 60 rectangular duct; Enhanced U Values
Comments	Preferred Part L Compliance Selection	Preferred Part L Compliance Selection	Maximum of 3 kWh/m ² exceeded for this option.	Preferred NZEB selection based on cost optimal analysis	Reduced electricity cost in future will aid NZEB Design	Roof area not significant enough in area for this option for PV and Solar	Roof area not significant enough in area for this option for PV and Solar

DESIGN APPROACH:

- STEP 1 - CONCEPT DESIGN
- STEP 2 - OUTLINE DESIGN
- STEP 3 - DETAILED DESIGN
- STEP 4 - SERVICES
- STEP 5 - COSTING
- STEP 6 - HPI INDEX
- STEP 7 - HYGROTHERMAL
- STEP 8 - OVERHEATING

STEP 2: OUTLINE SPECIFICATION (PART L AND NZEB)

Reference:	Part L - Option 1	Notes:	Option 4 - NZEB	Notes:
Dimensions	63.96		66.63	
Ground Floor Area (m ²)	2.45		2.44	
Ground Floor Height	69.84		59.38	
First Floor Area (m ²)	2.76	Average height calculated	2.70	
Living Area (m ²)	18.74	Living Room	18.00	
Total Floor Area (m ²)	132.90		130.10	
Living Area Percentage	0.14		15.9%	
Number of Chimneys	0	No Chimney	0	No Chimney
Number of Open Flues	0		0	
Number of Fans and Vents	3	Kitchen Extract, 2 Bathroom extracts	1	Kitchen Extract Only
Drainage Lobby	No		No	
Air Permeability Test (C50)	3	C50/20 < 0.15	1.5	C50/20 < 0.075
Ventilation Method	Natural Ventilation	Natural ventilation with adjustable closing	MVHR	MVHR
Building Elements				
Ground Floor (W/m ² K)	0.178		0.107	200 mm Xtrathem
Passage Way Floor to First Floor (W/m ² K)	0.189		0.141	150 mm Xtrathem with concrete ceiling tile
Roofs (W/m ² K)	0.148		0.109	400 mm Fibreglass
External Walls (W/m ² K)	0.18		0.109	150 mm Xtrathem Fullfill (OK with brick as agreement certificate) and 70 mm webertherm MTD
Doors (W/m ² K)	1.4		1.4	
Window-U Value (W/m ² K)	0.74	Triple Glazed Unit (Ref:Futureproof Window)	0.74	Triple Glazed Unit (Ref:Futureproof Window) 4-20-4-20-4
Heating - Solar Transmittance (G perp)	0.61		0.61	Calculated & Modelled Thermal Bridging Factor
Thermal Bridging Factor (W/m ² K)	0.0816		0.0127	Calculated & Modelled Thermal Bridging Factor
Cylinder volume (L)	365 L	Solar Heating System with 3.2 m ² of Erapan Type Panel	500 L	Solar Heating System with 4.4 m ² of Erapan Type Panel
Declared loss factor (kWh/day)	Default		Default	
Cylinder heat	Yes		Yes	
Primary Circuit Loss	Insulated and Cylinder Stat		Insulated and Cylinder Stat	
% of low energy fixed Lighting	100		100	
Lighting and Internal gains				
% of low energy fixed Lighting	100		100	
Max Space Heat Demand	High	Calculated	High	
Thermal Mass Category				
Distribution system loss and gains				
Heating System Control Category	Time and Temp		Time and Temp	
Heating System Response	Radiators		Radiators	
Central Heating Pump number	1		1	
Central Heating Pump Consumption	130		130	
Gas Boiler Fuel Fan	1		1	
Energy Requirement-Space Heating				
Main Space Heating	Gas Boiler		Electricity	
Efficiency of Main Heating (%)	0.915		100.00	
Efficiency of Water Heating (%)	1.02	with weather compensator	1.0	
Secondary Heating	None		None	
Energy Requirement-Water Heating				
Water Heating	Gas Boiler		Electricity	
Efficiency of Water Heating (%)	1.02		1.0	
Efficiency Adjustment Factor				
Energy Requirement-Renewable and Energy Saving Technologies			2	
Number of PV panels	0.00		294	Northwest Facing
Part L Total Contribution (Electrical kWh/yr)			294	
Heat Pump Fuel/Other Total (Thermal kWh/yr)			155	Instantaneous Waste Heat Recovery System
Results				
Energy Label	A3		A2	
Energy Value (kWh/m ² /yr)	55		27	
CO ₂ Emissions Indicator	10.54		5.62	
CPC	0.393		0.196	
EPC	0.363		0.194	
Part L Renewable Contribution (kWh/m ² /yr)	12.2		21.8	

STEP 3: DETAILED DESIGN AND SPECIFICATION

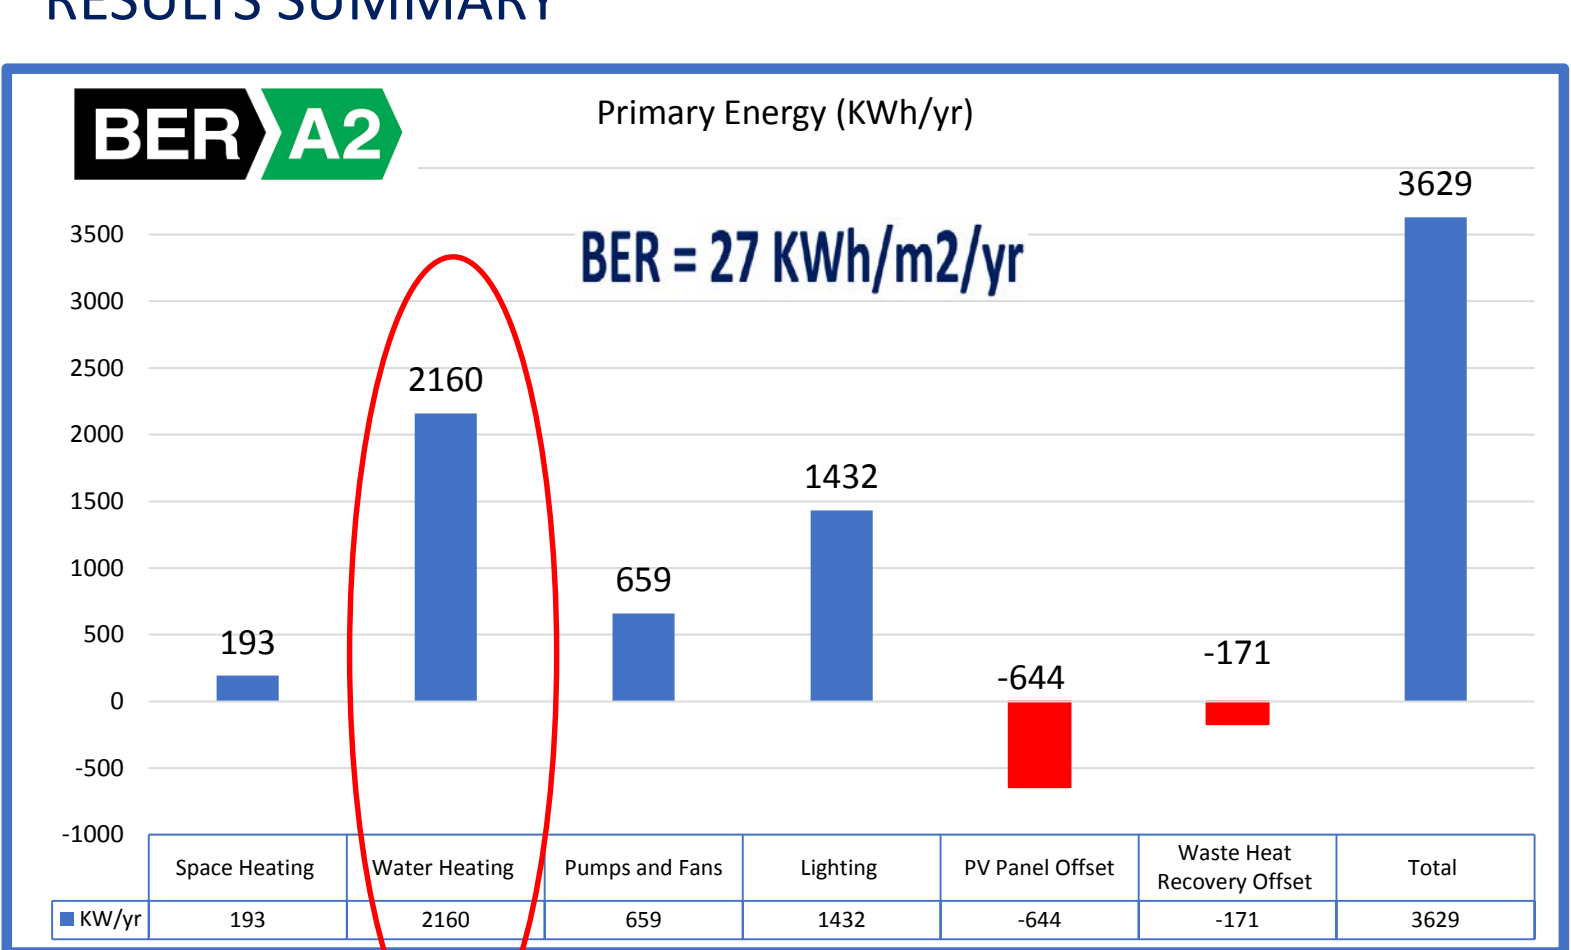

THERMAL BRIDGING

41% IMPROVEMENT ON BER EQUIVALENT TO 6 NO. PV PANEL INSTALLATION

RESULTS SUMMARY

THERMAL BRIDGING SUMMARY

Ref.	Accredited Detail Reference and Junction Detail Description	Length	Accredited Detail Value	Enhanced Insulation and Thermally Modelled
1	1.02b: Ground Floor - Insulation below slab plus lightweight block - Floor Junction	26,300	0.0610	0.04079
2	1.06.1: Masonry Solid Separating Wall (gap) - To Adjacent Units	15,940	0.0660	-0.00285
3	1.09/1.10: Eaves - Unventilated/ventilated attic - Junction of Eaves	16,380	0.0390	0.03710
4	1.04: Concrete Intermediate Floor within a dwelling - First Floor	34,500	0.0390	-0.04939
5	1.27.1: Corner - Corner Detail	14,120	0.0320	0.01313
6	1.27.2: Inverted corner - Inverted	10,420	-0.0530	-0.09397
7	1.01: Masonry Partition Wall - Masonry Wall to External	10,420	0.0000	0.00000
8	1.23.1: Open - Pre-stressed concrete lintels - Window Heads (except first floor bay window)	14,480	0.0040	0.00536
9	1.22: Open - Reinforced steel lintel (stainless steel) - First Floor Window Head (Steel Lintel)	1,513	0.1380	-0.01670
10	1.24: Open - Lintel with clouet block - Side Jamb	25,718	0.0250	0.01062
11	1.26: Open - Concrete Forward Sill - Sill Throughout	13,233	0.0060	-0.00017
12	G.01.2: Masonry Separating (Solid) Wall Section to Attic	18,400	0.0580	0.05900
13	G.05.1: Solid Masonry Separating Wall through ground floor	9,130	0.2400	0.24000
14	1.27.2: Inverted corner - Underslab Inverted Corner Detail	9,400	-0.0530	-0.09397
15	G.01.2: Masonry Separating (Solid) Wall Head - Underslab Section	9,400	0.4580	0.02842
Total W/K			20.3850	3.1819
Total Envelope Area containing Thermal Bridges (m²)				249.85
Calculating Y Factor for Thermal Bridging [W/m²K]			0.0816	0.0127

Frsi COMPLIANCE SCHEDULE

Ref.	Accredited Detail Reference and Junction Detail Description	Frsi Values
1	1.02b: Ground Floor - Insulation below slab plus lightweight block - Floor Junction	0.93
2	1.06.1: Masonry Solid Separating Wall (gap) - To Adjacent Units	0.97
3	1.09/1.10: Eaves - Unventilated/ventilated attic - Junction of Eaves	0.92
4	1.04: Concrete Intermediate Floor within a dwelling - First Floor	0.97
5	1.27.1: Corner - Corner Detail	0.95
6	1.27.2: Inverted corner - Inverted	0.95
7	1.23.1: Open - Pre-stressed concrete lintels - Window Heads (except first floor bay window)	0.99
8	1.22: Open - Reinforced steel lintel (stainless steel) - First Floor Window Head (Steel Lintel)	0.97
9	1.24: Open - Lintel with clouet block - Side Jamb	0.94
10	1.26: Open - Concrete Forward Sill - Sill Throughout	0.94
11	G.01.2: Masonry Separating (Solid) Wall Section to Attic	0.95
12	G.05.1: Solid Masonry Separating Wall through ground floor	0.95
13	1.27.2: Inverted corner - Underslab Inverted Corner Detail	0.95
14	1.27.2: Inverted corner - Underslab Inverted Corner Detail	0.95
15	G.01.2: Masonry Separating (Solid) Wall Head - Underslab Section	0.96
